to Your Real-Time
Challenges**

CACI
VISION
Solution
C E N T E R

Now You Can Define, Model, Prototype, and Visualize Before You Build

CACI's Vision & Solution Center was designed to help better define your redesign goals and objectives, model possible alternative solutions, prototype the best choice for your needs before implementing it, and visualize a working simulation so you can see your solution in action. If you wish, our experts can also help increase the performance of your existing IT investment.

Best of all, we help you integrate your diverse enterprise requirements into a comprehensive solution that encompasses all architectural levels within your organization.

Business Architecture for evaluating your policies, processes, rules, users, locations, and workflow

Data Architecture for ensuring that you are using the most advantageous database(s) for your particular requirements

Applications Architecture for recommending the addition of new, more streamlined applications, or disposing of inefficient legacy systems

Technology Architecture for planning upgrades in hardware, communications, information assurance, and more

*Only CACI's Vision and Solution Center offers
you a logical, comprehensive method of finding
the right solution for your particular vision.*

Take Your New Enterprise Solution for a 'Test Drive'

Whether your needs are wired or wireless, tactical or non-tactical

...CACI's Vision & Solution Center has the experts and resources on hand to offer you a seamless, customized result.

Simulation Environment

CACI was founded on simulation technology, and we can prototype business process changes, custom or COTS ERP applications, telecommunication solutions, and more.

Visualization Room

We can help you visualize one or more possible solutions through hands-on interaction, helping you see your solution at work – and actively direct its evolution.

Network Operations Center

CACI's network operations center provides a complete suite of managed network solutions for security purposes, fault detection, performance monitoring, configuration management, and detailed cost accounting.

Network Engineering

Our comprehensive, state-of-the-art communications laboratory can demonstrate networking, business continuity, storage area networks, and connectivity alternatives. Through our Lotus Notes®-based engineering environment, you can collaborate with other CACI centers of excellence, client environments, and technology partners.

Information Assurance Lab

We employ over 30 certified security professionals at multiple information assurance laboratories for testing both wired and wireless security solutions.

In-House Multimedia and Communications

Transforming enterprise culture and public perceptions to new ways of doing business can be a real challenge. Our award-winning, in-house multimedia and business communications services are designed to help you craft and deliver your messages effectively using video/film production, strategic communications planning, interactive training, and more.

A New Way to Envision & Test Improvements to Your Enterprise Architecture

Managers today face a monumental task of balancing – and integrating – disparate, often autonomous parts of their enterprise into one well-oiled machine

...within budget, of course. While some solution providers may offer laboratories that let you play with the latest enterprise technologies, only one offers a logical, comprehensive method of finding the right solution for your particular vision:

At CACI's Vision & Solution Center, we give you a way to "test drive" your IT solution before risking money and manpower installing it throughout your enterprise. We combine hardware, software, connectivity, and simulation technology with our unique, in-house multimedia presentation capabilities to help you analyze and evaluate alternative enterprise solutions before fully committing to them.

CACI was founded on simulation technology in 1962, and it remains a core building block for many of our solutions. We rely on our proven simulation, modeling, and analysis expertise in meeting enterprise redesign and reengineering challenges.

**CACI's Vision & Solution Center
can help you:**

- **Improve key functional areas
by institutionalizing processes**
- **Transform into a
process-centered organization**
- **Eliminate the risks of system
modifications**
- **Reduce gaps in performance
and production time**
- **Maximize resource allocation
and efficiency**
- **Implement crucial performance
measurements and incentives**

Client Service Is Our Number One Priority

At CACI, the client is number one. This is our guiding principle as a client-oriented company. Business success for our company and its people begins with quality client service.

Project Excellence^{PLUS}, our independent project assessment program, helps us sustain our high levels of client support. It is our benchmark to evaluate project performance, maintain growth, and continue to achieve complete client satisfaction.

Information Technology Is Our Number One Strength

CACI provides the IT and network solutions needed to prevail in today's new era of defense, intelligence, and e-government.

From systems integration and managed network solutions to knowledge management, engineering, simulation, and information assurance, we deliver the IT applications and infrastructures our federal customers use to improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness.

Our solutions lead the transformation of defense and intelligence, assure homeland security, enhance decision-making, and help government to work smarter, faster, and more responsively. CACI provides dynamic careers for approximately 6,400 employees working in more than 90 offices in the U.S. and Europe. CACI is the IT provider for a networked world.
