## CACI Supports “100 Days of Learning” at Local School Employees Enjoy Reading — Children Enjoy Listening

On January 26, 2001, four CACI employees participated in “100 Days of Learning” activities at Maury Elementary in Washington, D.C., a school CACI supports through its CACI Cares program. The event was designed to promote reading and language arts, with presentations, poetry, and contributions that ranged from book and financial donations to spending time reading to the children.

### Community Leaders Help Out

Also participating with parents and community members were D.C. council members Linda Cropp and Phil Mendelson, School Superintendent Dr. Paul Vance, and Virginia Hayes Williams, mother of Washington D.C. Mayor Anthony Williams.

“The kids were fantastic,” said Andy Stitt, web developer for [www.caci.com](http://www.caci.com), CACI’s Internet home page. “I enjoyed reading to them but was also impressed with their technological prowess — they produce their own television news show daily.”

*Virginia Hayes Williams, Washington D.C. Mayor Anthony Williams’ mother, reading to class at Maury Elementary.*

and this gave me lots of ideas.”

CACI Cares hopes support for local schools and activities like these will spread. Said the fourth CACI reader, CACI Cares Management Advisor Jody Brown, “As a company, CACI has supported the Maury students for several years. They look at CACI as a sustained partner in the

CONTINUED ON PAGE 10

Other CACI readers included BG08 programmer/analyst Elana Churchill, who said, “It was exciting for me to watch them get excited about reading. It was also fun because the kids had a hand in the opening presentation and other parts of the program. It was a very kid-centered day.”

### Both Students and Readers Learn From Experience

Tamara Adams, a member of our Accounting group, agreed. “It was thoroughly engaging. I have a child in the D.C. public schools

# Silent Auction Fun Supports CACI in *Motion* Teams, Runs Through March 7

CACI Cares opened the gates to another Silent Auction in support of CACI in *Motion*. The “All Things Italian” auction will run through March 7, and you’ll find the auction — and bid information — on CACINet. You still have time to check out the exciting items up for bid and help support our CACI in *Motion* team racing in the Team Diabetes Marathon in Rome, Italy. Supporting the American Diabetes Association are CACI employees Luis Carranza, engineering technician, and Bill Turrentine, project manager, both in Chantilly, VA.

## What’s Available

Items may be added throughout the bidding period, so take a minute each day and check out what’s available. Among the items up for grabs you’ll find:

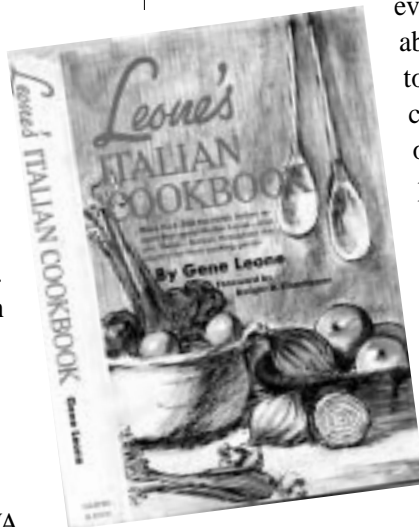

- *The Pasta Cookbook*, offering valuable how-to information on choosing, making, and cooking pasta, plus over 350 recipes to keep you dish-ing up spaghetti, macaroni, lasagna, and more.

- Don’t want to cook? A scrumptious dinner for two is available at Pulcinella Restaurant, located in McLean, VA.

- Want to expand your Italian cooking skills beyond pasta? Check out *Leone’s Italian Cookbook*, with

over 300 delightful recipes. This cookbook features a foreword written by Dwight D. Eisenhower.

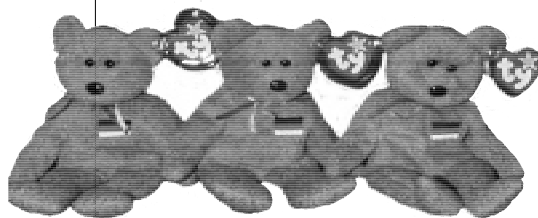

- If collecting stamps is your hobby, or you’ve ever thought about it, be sure to bid on the collector’s set of Italian postage stamps now available.

- Attend your next CACI meeting in style and display your

notebook with an autographed cover — made of a basketball-like material and signed by Washington Wizard Mitch Richmond.

- Three adorable Germania Bear Beanie Babies, complete with

plastic covers on their tags, for your favorite collector.

## Auction Proceeds Support Fundraising Efforts

Remember, all silent auction

proceeds go directly to CACI in *Motion*-sponsored charities, to support the fundraising efforts of the CACI in *Motion* teams. To bid on an item you must either fill out the item information page at the site, or contact Jody Thompson at (703) 841-7908.

## Donations Are Accepted

Auction items are always welcome — if you wish to donate an item to the CACI Cares silent auction, contact Jody Thompson at [jthompson@caci.com](mailto:jthompson@caci.com).

Items that are religious or political in nature cannot be accepted, and all items must be in good condition. Donations do not have to be sports-oriented or Italian; the greater the variety, the greater the auction excitement!

# Dear Team

The CACI family is growing. And as more new members join, it's critical to teach them about our corporate culture and the full range of solutions we offer clients. That means it's more important than ever to be educated about CACI.

As managers and employees, please make sure you are current on all aspects of CACI, including our culture, policies, benefits, award programs, and more.

Read my Chairman's Notes, now published twice monthly via e-mail, and visit our websites ([www.caci.com](http://www.caci.com) and [www.hq.caci.com](http://www.hq.caci.com)) regularly. Even better, become a part of the information flow and provide input to the *CACI Times* by contacting Michael Pino at (703) 841-3743, [mpino@caci.com](mailto:mpino@caci.com). If you have suggestions about our overall communications, get in touch with Employee Communications Manager Rosemary Boggs at (703) 841-2951, [rboggs@caci.com](mailto:rboggs@caci.com).

I also encourage you to learn more about our CACI Cares organization, which supports employees and their communities across the company. Maybe there's a project near and dear to your heart that CACI Cares can help with. You might even want to join yourself — there's always room for more volunteer support! Contact CACI Cares Chairperson Pat Jackson at (703) 679-4501, [pjackson@caci.com](mailto:pjackson@caci.com), for more information.

Once you've gotten the "big picture" about CACI, make a commitment to share this with a new member of our team. One of the best ways to familiarize newcomers with CACI's business and culture is to participate in our Sponsorship Program. This effort pairs CACI veterans with new employees in a mentoring relationship. Ask your manager for more information, or check in with Sharon Barbour of our Human Resources Department at (703) 841-7857, [sbarbour@caci.com](mailto:sbarbour@caci.com), for a complete sponsorship package explaining the program. This is an important way to sustain our corporate culture and communicate it to a new Team CACI generation.

By the way, when a great team puts its mind to it, there's little they can't do. And I'm proud to say Team CACI is scoring record returns on revenue, client support, and community recognition.

Keep up the good work!

J. P. (Jack) London  
Chairman of the Board,  
President, and  
Chief Executive Officer  
CACI International Inc

## HR Corner

# We've Reorganized to Serve You Better

CACI's Benefits Department has reorganized to serve you better. The chart below shows whom to contact for all your benefit questions.

The Benefits Department is ready to assist employees in a number of ways. Contact your Benefits Administrator if you:

- Have questions or want to confirm current benefit elections
- Need an explanation of how to use your medical or dental coverage
- Need instructions on how to submit a claim
- Need a new Identification Card or provider directory
- Have problems with a claim you could not resolve by contacting the insurance company
- Are moving and want to confirm that your medical/dental plan will continue in your new location

• Need information on Disability Insurance and Family and Medical Leave

• Are taking a personal leave of absence and need information on benefits continuation

• Think you experienced a "qualifying event" — a marriage, birth, or other significant event as defined by the IRS — and want to change your current elections.

**Reminder:** CACI administers a tax-qualified benefit plan and benefit elections changes may only be made during the annual open enrollment period (normally held in late May) or if the employee experiences a qualifying event. All paper-

*HR Benefits contacts (front row, l-r) Lovelen Pyles, Aminata Jammeh, and Wilhelmina Matthews; (back row, l-r) Jill Farley Coplon, Kim Jackson, Donna Stroy, and Jennifer Gould.*

work must be completed and submitted to the Benefits Department within 30 days of the event. Benefits changes commence on the qualifying event date.

CACINet has valuable online resources available, including insurance claim forms, insurance information, contact phone numbers, and links to providers.

# ATLASS Covers a Lot of Ground

CACI people who support the U.S. Navy find themselves working all over the world, onboard ship and at shore sites. Our BG01 team supporting ATLASS (the Asset Tracking Logistics and Supply System) II+ is no exception, with taskings everywhere from Camp Lejeune, North Carolina to Okinawa, Japan.

*Marines accessing the ATLASS II+ application in the field.*

CACI supports ATLASS II+ for the Space and Naval Warfare Systems Center in Chesapeake, Virginia, and is now helping to field it to Marine Corps Expeditionary Forces worldwide. A new tactical command application, ATLASS II+ helps keep Marine Corps ground equipment in peak operating condition by providing comprehensive tracking and visibility of assets.

ATLASS II+ has been very successful so far. "It's a perfect fit for the Marine Corps," said CACI maintenance analyst James Roarty, "combining their maintenance and supply systems into one easy-to-use program." ATLASS II+ is now serving all Marine Corps Expeditionary locations, including Camp Lejeune, Camp Pendleton in California, and Okinawa. And when CACI people

are not on site supporting the system, they're testing the ATLASS II+ database for problems and improvements out of our Chesapeake office. Throughout, the goal is to ensure a smooth transition for the Marine Corps units to the new program.

CACI employees dedicated to ATLASS include Charles

Baxter, Jo Ann Bromberger, Tyrone Campbell, Bill Crisp, Robert Fowler, Anthony Goodwin, Lawrence Handy, William Henley, Robert Hulse, Jeffery Irwin, Louis Nowell, John O'Shea, Steven Priest, Charles Urgitus, Jim Vascherault, Anthony White, Chris Whitesock, Bret Wood, and administrative assistant Katey Gregory.

*For more information, contact John O'Shea at (757) 420-4569 ext. 307, [joshea@scn.spawar.navy.mil](mailto:joshea@scn.spawar.navy.mil).*

## Document Center Supports DoD's General Counsel

For CACI project manager Steve Jefferson and his Crystal City team, supporting the U.S. Department of Defense in major court cases involves coding, copying, and organizing massive amounts of information. Many of these cases have made headlines around the world.

"We support a lot of cases that the Attorney General gets involved with," said Jefferson. A veteran of more than 10 years with CACI, Jefferson works with a core group of four people, including administrative specialist Cecilia Howard, and when necessary, Jefferson has also used the resources of other CACI departments.

The Crystal City team has grown a lot since 1991, when it was opened

to support the U.S. Department of Justice on the A-12 case, a widely publicized dispute between the U.S. Navy and two government contractors. Now Jefferson and his colleagues work solely on DoD contracts.

The transition to DoD work began in 1998 when Harold Kwalwasser, Deputy General Counsel at the Pentagon, initiated a project with the document center. The team's work for Kwalwasser led to four contracts with the Pentagon's Office of the General Counsel. Jefferson used CACI staffers who worked on A-12 — they had the necessary experience and security clearances.

Since then, a combination of

*Steve Jefferson, Christine Hollins, Cecilia Howard, and Joseph Hunt.*

entrepreneurial spirit and a willingness to work overtime to get the job done has paid off for Jefferson and his team. Now, he notes, "The fact that we've been working for them for more than two years has given them faith in what we've done, and what we can do."

*For more information, contact Jefferson at (703) 418-4198, [sjefferson@caci.com](mailto:sjefferson@caci.com).*

# Welcoming N.E.T. Federal and Radian Employees

On Thursday and Friday, January 25-26, CACI held its first orientation for our new team members from our N.E.T Federal and Radian acquisitions.

On Thursday, new managers from these groups attended a series of presentations at the Marymount University auditorium across the street from CACI headquarters in Ballston, VA. CACI CEO Dr. J.P.

London gave the welcoming address, and presentations included an overview of CACI business groups as well as an introduction to our policies and procedures. That evening Dr. London hosted a catered reception in the Elephant Suite of our headquarters location, enabling CACI senior management to personally meet and welcome our newest employees into the CACI family.

Former senior N.E.T. Federal manager and new CACI Vice President Dick Waterman with CACI CEO Dr. J.P. London.

CACI Operations Executive Officer John Davis presenting an overview of our Information Systems Group.

On Friday, the orientation moved to our Park Meadows location in Chantilly, VA, home to CACI's state-of-the-art technical facility, the Vision & Solution Center. There, after an opening talk by CACI, Inc. President Ken Johnson, the newcomers received more in-depth briefings on everything from travel and security procedures to using CACI's corporate information systems.

According to CACI Vice President Andy Mesterhazy, a key player in initiating the orientation, "The feedback from attendees was very, very positive. They were impressed with the presentations and felt that the company really cared for them!"

For more information, contact Gordon Jackson of the Project Resource Group at (703) 679-3328, [gjackson@caci.com](mailto:gjackson@caci.com).

## Letter From the UK

# UK Group Launches Data Depot

CACI's United Kingdom-based Marketing Systems Group has launched the Data Depot, a one-stop shop for the largest collection of demographic, marketing, and mapping data for the UK, Europe, and the USA. The Data Depot is part of an expanding initiative by CACI to widen the availability of its international data library and meet the needs of marketers using in-house geographic information systems.

CACI UK's new service simplifies the process of identifying and purchasing data. Customers can discuss their requirements with market information specialists, or order directly from the Data Depot online catalog, [www.datadepot.co.uk](http://www.datadepot.co.uk).

Greg Bradford, President of our UK organization, commented that "In the past, CACI linked the sale of data to the sales of software systems such as our InSite package, or to

consultancy work. Increasingly, companies are handling simple geodemographic profiling in-house, and we can now supply the raw data to all customers, regardless of their base hardware or software system."

Typical applications of the geodemographic data include planning site locations, customer/product segmentation, targeted direct marketing, identifying areas for new business drives, and the planning and distribution of customer services and resources.

For more information, visit [www.caci.co.uk](http://www.caci.co.uk) or [www.datadepot.co.uk](http://www.datadepot.co.uk).

# CACI Times Interview With Bill Fairl

*Bill Fairl assumed leadership of CACI's BG01 organization, Integrated Engineering Support Systems, in December 2000. Previously a senior vice president with the BG07 Research and Technology organization, Fairl inherits a key CACI Business Group from John Davis, now our Operations Executive Officer.*

## **Bill, you're in a newly visible role in the company. What's your background?**

I graduated in 1971 from the University of Detroit, with bachelor's and master's degrees in electrical engineering. I gave up an unpromising career as a musician to work on data fusion problems for a company called Comptek in Buffalo, NY, my hometown.

In 1988, I became manager of QuesTech's San Diego operations. I made VP in 1992 and SVP in 1996. In 1998, we joined CACI as BG07. I was in charge of our Air Force, Navy, and intelligence work.

## **What is your vision for BG01?**

I'm focused on the idea that our business has always been and will continue to be a relationship business — with our people, our clients, and our shareholders.

BG01 has terrific working relationships with its clients. The challenge is that these clients are spread out across the country. We're a nationwide organization with diverse technology and service offerings.

On the East Coast, particularly the Washington, D.C. and Norfolk areas, we're known for Navy engineering and logistics support.

In Texas, Oklahoma, Ohio, New York, and Florida, we're providing

engineering and technology solutions for the Air Force. And on the West Coast, we have a solid systems engineering and integration capability for the Navy and the Federal Aviation Administration.

My goal is for us to find the new opportunities in those hard-earned relationships.

## **Any success stories?**

Yes! Our new Wallops Island office is a great example.

About a year ago, we won a contract to provide Cooperative Engagement Capability (CEC) support to the Naval Surface Warfare Center, Port Hueneme.

Using BG01's East Coast relationships, we met a client with a CEC requirement at the Navy's Wallops Island, VA facilities.

---

***We connected the dots from Port Hueneme to the customer in Wallops Island, using the relationships we have with the Navy in Washington.***

---

They liked our capabilities and decided to engage us. Now we've opened a CEC support office at

*BG01 Executive Vice President Bill Fairl.*

Wallops Island and are hiring new staff. Our customers at Port Hueneme love it — they can use the Wallops Island facility, and we represent their interests there.

For the final link, the CEC Program Office in Washington decided they need our help, too. They now refer to CACI as their national CEC contractor. That's teamwork!

**About 300 people and \$30 million a year in contracts are moving from BG07 to BG01. How do you see the transition?**

Smooth! Former BG01 head John Davis really encouraged collaboration. That's always been true in BG07, so I see the makings of a great new organization — people want to work together.

It's a tremendous time for BG01 and our company. We've got great people, capabilities, relationships, and contract vehicles; we can't go wrong!

# Navy Commends Computer Incident Response Team

When someone attempts an unauthorized entry or an information attack on the U.S. Navy's computer systems, it's time for CACI's BG02 computer incident response team in Norfolk, VA, to get involved.

"Wherever the Navy is, if they have a computer and if anything happens to it, they must report the problem to us," said Mike Mosher, the group's manager.

The computer security specialists on this 17-person team have received many commendations since they began work five years ago at the Little Creek Naval Amphibious Base in Virginia. The latest commendation was issued by the Navy's Fleet Information Warfare Center (FIWC) Captain Kenneth Parks. CACI's Mari Kirby, Steve Saunders, and Randy Emery were commended for processing

more than 3,000 incidents in eight months.

"These were valid incidents that required hands-on expertise," said Mosher.

The Norfolk team has also been commended by FIWC for systems engineering projects, database design and development, saving money for the Navy, and other kinds of technical expertise and service "above and beyond the call of duty."

"We do all kinds of stuff for the Navy ... they love us here," said Mosher. "We are integrated in every facet of this operation — we install the systems, we monitor them, and we handle the information they collect."

Mike Mosher, commendation recipient Randy Emery, Capt. Kenneth Parks (FIWC Commanding Officer), and commendation recipients Mari Kirby and Steve Saunders.

This team also specializes in intrusion detection monitoring — a more proactive approach to computer security that involves installing and monitoring devices that sniff out trouble on Naval computer networks.

For more information, contact Mosher at (757) 417-4025, [mmosher@caci.com](mailto:mmosher@caci.com).

## Automating Army Medical Records

CACI's Lou Lartigue and his team, members of the BG08 Federal Systems Integration organization, are leading the charge to help the Army automate its medical records for greater efficiency and ease of use.

Lartigue recently established a Ft. Lewis, Washington Army field office to support software used by the Army's Medical Communications for Combat Casualty Care (MC4) Program Management Office. The software application, known as the Theater Medical Information Program-Army (TMIP-A), automates medical treatment records for combat medics.

TMIP-A was also recently fielded to the 4<sup>th</sup> Infantry Division at Ft. Hood, Texas, headed by CACI's Daryl Hornsby. Hornsby has been fielding and training high-frequency radio systems since June of last year. A second phase of the project — extensive fielding to National Guard and Reserve units as well as units in Korea and Germany — began in February.

"Our new field offices are proving to be very beneficial to the client," said Lartigue, "greatly reducing the travel and response time for the MC4 home office in Frederick."

M.D. Mandeville and Dave Braunies of the Ft. Lewis MC4 field office are also training combat medics from the newest Army fighting force, Interim Brigade Combat Teams, on the new software.

Lartigue and Bob Torche round out the CACI's MC4 support at Ft. Detrick in Frederick, Maryland. Torche provides risk management support and is responsible for the development of a handheld medical recording device program.

For more information, contact Lartigue at (301) 619-3770, [louis.lartigue@AMEDD.Army.mil](mailto:louis.lartigue@AMEDD.Army.mil).

# It's All in the Details for Utah Team

Attention to detail is an integral part of the workflow for the CACI team supporting Hill Air Force Base in Utah. "Our primary duty is the reformatting of information and documents," explained Jay Hitchcox, lead systems analyst, "and even a minor error can be costly. We're working with a number of different legacy systems, and we have to be certain that 'everyone's talking' to accounting."

CACI is supporting the Air Force's efforts to tie their depot maintenance, production system, and accounting system together. In this way, when a change is made in one legacy system, it will automatically carry over to other applicable systems.

"This is particularly critical for work control documents going to the production floor," explained Hitchcox. "We make sure work documents match the tech orders, which in turn match the materials consumed so that the job can be costed back appropriately. Ultimately, there is a complete tracking and accountability of all materials, production, and repairs. The client will know exactly how long it took to produce a part and the cost."

Last month, the CACI team of 17 reformatted over 120

(left to right) Raylene Watt, Trina McDonald, Carol Ercey, Rick Sweeten, Ray Myrup, Gene Holm (back), Doug Kirgis, Judy Child (back), Trina Romero (back), Bob Worden, Mike Day, Don Leach, and Jay Hitchcox.

work control documents — just for minor aircraft struts. The total number of documents to be reformatted reaches into the thousands. And that's when our team's expertise and eye for detail really pay off. "It is of paramount importance that the system work smoothly," said Hitchcox, "because of the quantity. We're keeping a close eye on all the details to ensure success."

For more information, contact Hitchcox at (801) 586-9350, [jhitchcox@caci.com](mailto:jhitchcox@caci.com).

## Trade Show Update

### Assured Information Solutions Group (BG02) Has Successful Exhibit at LegalTech Conference

BG02's Charles Peterson, Fola Dosumna, Karen Stewart, and Vincent Carter at the LegalTech show.

BG02 team members recently returned from a highly successful show at the LegalTech Conference, January 29-31, in New York City. Booth traffic was excellent, as the BG02 team demonstrated CACI's latest solutions for the legal market, including our new Legal Toolkit Navigator software and our courtroom technology and debt management systems.

Congratulations go to BG02 Executive Vice President Gail Phipps and her team of Bob Brockman, Vincent Carter, Fola Dosumna, Beth Gavin, Gary Pate, Charles Peterson, and Karen Stewart.

For more information, contact Brockman at (703) 841-3739, [bbrockman@caci.com](mailto:bbrockman@caci.com).

### Demonstrating e-Business Solutions at Top New York Show

Our e-Business Solutions business group (BG05) has also recently returned from New York City, from the highly successful show at the nation's largest gathering of "e-tailing and retailing" firms — the National Retail Federation's 90th Annual Convention & Expo. Over 15,000 were in attendance January 15-16. BG05 displayed their e-Procurement and e-CRM (electronic Customer Relationship Management) products at this high-profile show, with teamwork from our Federal Systems Integration organization (BG08) who demonstrated the newest version of our SIMPROCESS® business process simulator.

For more information, contact Trade Show Coordinator Patti Rusher at (703) 841-2950, [prusher@caci.com](mailto:prusher@caci.com).

The BG05 NRF team (l-r) Bob Freeman, David Huffman, Mark Bloom, Pete Farrell, Kent Guthrie, Val Eichenlaub, Rich Weiss, and Tony Phillips.

# Tapping into CACI's Web Talent

CACI's Web Services team in BG05, our e-Business Solutions organization, recently helped the Commonwealth of Virginia's Department of Medical Assistance Services (DMAS) revamp its website to comply with an executive order issued by the Governor of Virginia. The site ([www.cns.state.va.us/dmas/](http://www.cns.state.va.us/dmas/)) links Medicaid recipients and providers, as well as other citizens, to DMAS forms and resources.

The project was initiated by CACI's onsite project manager, Frank Guinan, who had supported DMAS on its Y2K-related tasks and was asked to help the department comply with the executive order by December 31. Tapping into CACI's Web Services talent, Guinan contacted Bill Perry of BG05's Enterprise Engineering Division in Chantilly, VA. Perry designated Aimee Norwood as the project lead.

The other team members were Nelly Romero, Walter Milton, Kyung Park, Darrell Carpenter, Jeremy Wood, Carol Lacour, and Anastacia Stornetta.

CACI's Web Services team worked closely with the client, allowing DMAS employees to

review the website as work progressed. The site's 179 forms and 150 pages of content had to be easily accessible to all users, including those who are not highly technical or access the Internet through public library terminals. In addition, the team created a database that allows users to search the site for healthcare providers in Virginia.

The final website went live on Dec. 22 — more than a week before the governor's deadline.

"I think we made the site's navigation a lot more intuitive," said Norwood, "and people can now access information with fewer clicks. We don't want them to waste their time."

*For more information, contact Guinan at (804) 371-6453, [fguinan@dmas.state.va.us](mailto:fguinan@dmas.state.va.us).*

## CACI Cares

# Making a Difference in Our Communities

CONTINUED FROM PAGE 1

growth of their students and the school's programs. You know you've made a difference when the principal's opening remarks include a 'thank you' to the D.C. school superintendent, council members, and CACI!"

Moreover, CACI Cares is now helping to develop support programs for other schools. According to CACI Cares Chairperson Pat Jackson, "Shirley Underwood, of our BG05 group, has made arrangements with Poplar Tree

Elementary in Chantilly, VA. She's now looking for volunteers to read to the kids, and is exploring other ways we can provide support." Interested CACI people should contact Underwood at (703) 679-3547, [sunderwood@caci.com](mailto:sunderwood@caci.com).

*For more information on how CACI Cares can help in your community, contact Jackson at (703) 679-4501, [pjackson@caci.com](mailto:pjackson@caci.com).*

# BG02 Technology Day Highlights

BG02, our Assured Information Solutions organization, holds a “Technology Day” each year for its clients, and this year’s event was its best ever.

Held January 11 at our Vision & Solution Center in Chantilly, VA, BG02’s Technology Day promised “360 Degrees of Litigation Support”—demonstrating a wide range of information technologies and their relevance to the legal environment. Showcased were solutions ranging from CACI’s new Legal Toolkit Navigator “middleware” system to the application of artificial intelligence to document coding and searching.

“This was an exciting event for both CACI and our clients,” said CACI Chairman and CEO Dr. J.P. London. Find out more by visiting CACINet’s *CACI Times Online* section, under Employee News, for the complete article and additional photos.

# CACI in *Motion* From San Diego to Hawaii

Our CACI Cares' CACI in *Motion* program, designed to support employee efforts to raise critical funds for charitable organizations, is currently helping five CACI employees participating in marathon events this June. Representing two teams, these CACI people are dedicating time and energy to the physical training necessary to complete the race and raise needed funds.

## Rock 'n Roll Marathon — Rocking in San Diego

Jane Shaw, in our Chantilly, VA office, and Jeanette Martin, in Ballston, VA, will be covering their 26.2 miles in beautiful San Diego, CA, participating in the Leukemia and Lymphoma Society's Rock 'n Roll Marathon. The race, which takes place June 3, 2001, will offer plenty of moral support to participants, with local area bands and high school bands offering a musical boost at every half-mile marker.

## Team Diabetes Racing Through Kona

The three-member team of Cathy Khosrovian, Chantilly, VA, Tera Smith, Oklahoma City, OK, and Simion Manickavasgam, Washington, D.C., will be running amid a spectacular setting as they race in Kona, HI. They are participating in Team Diabetes, an

event of the American Diabetes Association. This marathon, also 26.2 miles, will be held June 24, 2001.

## About CACI in *Motion* Support

CACI in *Motion* provides a \$500 donation to the charity on behalf of each CACI employee team member to assist in the required fundraising endeavors. Team members have

... Jeanette Martin

also been supplied with "spare change" piggy banks to keep on their desk to remind their fellow employees of their race commitment and to assist in their fundraising endeavors. Additional support activities may also be scheduled by CACI Cares.

As noted above, CACI in *Motion* was established to recognize and support CACI employee efforts to raise

critical funds for charitable organizations. It specifically supports teams of CACI employees who participate in major running/walking/cycling fundraising events sponsored by certified charitable organizations.

*If you are interested in participating on one of these teams or would like to find out more about CACI in Motion, please contact Jody Thompson at (703) 841-7908, [jthompson@caci.com](mailto:jthompson@caci.com).*
