CACI Times

Welcome AlphaInsight

New Team Strengthens Support for Federal Civilian Agencies

By Michael Pino

The words on the slide summed it up: "You're now part of our team — let's make things happen!"

That message of collaboration and the drive to succeed was part of CACI Chairman, President, and CEO Dr. Jack London's opening presentation to the new team from AlphaInsight Corporation. The organization joins Randy Fuerst's Enterprise Technologies and Services (ETS) organization as the Applied Information Technology operating group. Dr. London and CACI management welcomed the new team on May 2 at our corporate headquarters in Arlington, Virginia.

Senior leaders see a natural fit for the new group and our CACI capabilities. "The Applied Information Technology Operating Group gives CACI a great new team to expand our core offerings for federal civilian agencies," Randy said.

The group excels in solutions for software and systems engineering, network engineering and management, and information assurance and security. It has a significant presence at the

Celebrating the arrival of our new Applied Information Technology group are Chief Operating Officer Bill Fairl, Chairman and CEO Dr. Jack London, new CACI Senior Vice President Kwang Kim, and President of U.S. Operations Paul Cofoni.

Department of State, with additional business supporting the Departments of Defense, Homeland Security, and Justice. Its nearly 360 employees join us with top security clearances among them.

"The talented team from AlphaInsight brings us unique technical skillsets and exciting new methodologies," said Paul Cofoni, CACI's President of U.S. Operations. "Our goal now is to preserve these capabilities, integrate them with our own, and go out and win the business!"

"We are delighted to join CACI," said former AlphaInsight President Kwang Kim, now a CACI Senior VP. "Together, we have a great opportunity to provide more resources for our clients and contribute to CACI's exciting growth."

As Dr. London explained, "Our new Applied Information Technology group brings a superb client portfolio and great strengths in the federal arena. They are a terrific match with our CACI culture. We look forward to their continued success as part of Team CACI."

A Million for the Marines

By Steve Castillo

It was a "shadowbox" plaque, custom built for its CACI recipient and complete with service flags and medallions. An entire Marine division had it made for the man who helped keep them supplied and ready — and saved more than $1 million in doing so. It was presented to Jim Aquino of our San Diego office, who was honored for his outstanding Marine Corps support.

A while back, Jim identified $1.4 million in savings for the Corps by recommending the recovery of three critically required helicopter gearboxes from a Defense reutilization office. And the processes Jim put in place have enabled the Marines to ensure many more critical components are in steady supply.

As a token of their gratitude, the entire Wing Aviation Logistics Division

San Diego's Jim Aquino, left, receives special recognition from Gunnery Sergeant Michael Caplinger for solutions that included saving the Marines more than $1.4 million.

Photo Courtesy U.S. Marines

contributed to present the framed shadowbox, in a ceremony presided over by 3rd MAW Colonel Dan Gillan.

As his manager, John Decker, notes, "Jim epitomizes the core of our FAST team — dedicated former Navy and Marine Corps personnel focused on training, assisting, and supporting Marine Corps aviation and our warfighters."

For a longer version of this story, visit the CACI Times Online section of CACInet. You can congratulate Jim at jaquino@caci.com.

Air Force Top Ten

By Kenneth Overton

Top performers are defined in many ways, but when the Air Force evaluates the best among the 350 contractor personnel supporting the Secretary of the Air Force Technical and Analytical Support (SAFTAS) contract, only the top 10 percent get the nod. And this year, five of those outstanding achievers were from CACI.

Under SAFTAS, CACI supports programs like the B-52 bomber and the Joint Strike Fighter, and assists with acquisition strategy and transformation policy. The focus is on providing highly qualified personnel who can ramp up quickly to meet client requirements.

Recently honored as SAFTAS Top Performers were Ken Fischer, Tiffany Gary, Ray Montgomery, Deanna Ryals, and David Williamson, all from our Rosslyn, Virginia office. Moreover,

David also won special honors from the B-52 support group as Contractor of the Year. All told, the 20-person CACI team, while only about 7 percent of the SAFTAS workforce, garnered approximately 17 percent of all the top honors.

"We have a top-notch team at SAFTAS," says Program Manager Kenneth Overton, "and the client is noticing!"

Contact Kenneth for more information at (703) 253-1372, koverton@caci.com.

Hasn't Lost a Step
A Hurricane Katrina Update

By Michael Pino

Like so many others, CACI's Ed Green lost nearly everything he had during Hurricane Katrina. Temporarily displaced from his New Orleans home, Ed still reports to the New Orleans team but is currently living in Montgomery, Alabama, where he was working on a project and where his daughter goes to school. And no matter what, he manages to find ways to help CACI, his client, and his fellow citizens.

When the government programmer on an important U.S. Navy database had to leave the project after his own hurricane-related problems, Ed stepped in to help.

According to Ed's manager, Bill Demers, "Ed was offered the position as well as the opportunity to work on site per diem, or from his own residence. He elected to work from Montgomery

CACI's Ed Green continues to support his clients — and help other Katrina victims — even though he lost his own home to the storm.

and save his client the per diem costs."

Meanwhile, according to Bill, "Ed's performance has continued to be top-notch — though he lost most everything in the storm, Ed hasn't lost a step in his work."

Ed also found out about a New Orleans church-based group that freely assists those in need. To learn more, read the detailed version of this article in the CACI Times Online section of CACInet. You can contact Ed at (504) 277-8927, ewgreen@caci.com. And if you want to share a Katrina update, contact Michael Pino at mpino@caci.com.

Our First NDU Grad

By Keith Gamboa

"I'm very impressed with the support CACI gives the National Defense University (NDU) Information Resources Management College (IRMC)," says Ray Emmerson, who works with CACI's National Security Research group in Crystal City, Virginia.

As the first IRMC alumnus to join CACI, he goes on to say, "My IRMC program was wonderful, and it really helped prepare me for what I'm doing now with our company." As a member of our Transformation Solutions Group, Ray currently supports critical infrastructure protection for the Department of Defense.

Each year, CACI presents a Distinguished Graduate Award to the top graduate of its Information Assurance

program. While Ray did not receive the award, he began his course work while still on active duty, completed the programs last spring, and received his certificates in April.

NDU is a world leader in national and international security education. According to Jim Hogler, who heads CACI's Enterprise Information Assurance &

Networks Division Group, "We recognize the importance of information security to our national security, and are pleased to promote continued excellence and education in this area. Ray is the first CACI graduate of the IRMC program, and we are proud he has joined our company."

For more information, contact Ray at remmerson@caci.com or 703-647-2246.

CACI Named to Fortune 1000

Places Eighth Among Top Information Technology Providers

By Michael Pino

Good fortune may often be the result of chance — but it was vigilance and hard work that led to CACI's latest success: being named to the Fortune 1000 list of the largest companies in the nation.
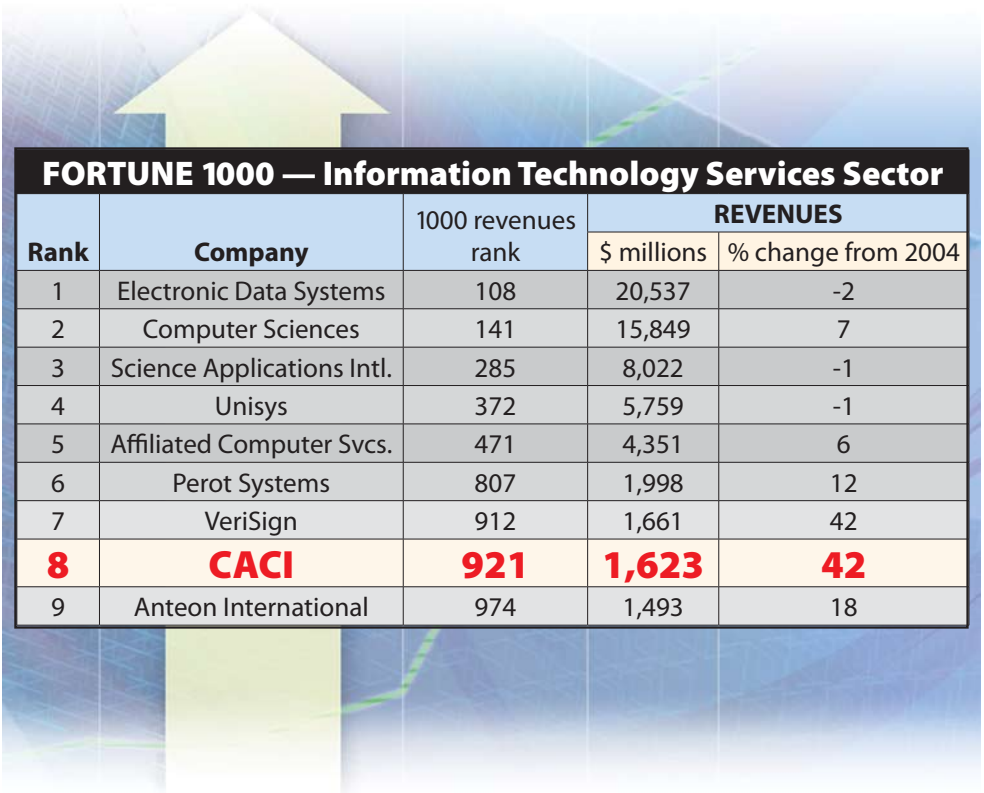

With record-setting revenue of $1.62 billion for fiscal year 2005, CACI entered the Fortune 1000 for the first time in our 44-year history, placing 921st among the nation's top firms.

Just as impressive, CACI was ranked 8th among the top information technology services companies, and our 42 percent revenue growth tied for first on that chart.

The Fortune 1000 is the "short list" of the most influential companies in America.

Rank	Company	1000 revenues rank	REVENUES	
			$ millions	% change from 2004
1	Electronic Data Systems	108	20,537	-2
2	Computer Sciences	141	15,849	7
3	Science Applications Intl.	285	8,022	-1
4	Unisys	372	5,759	-1
5	Affiliated Computer Svcs.	471	4,351	6
6	Perot Systems	807	1,998	12
7	VeriSign	912	1,661	42
8	**CACI**	**921**	**1,623**	**42**
9	Anteon International	974	1,493	18

FORTUNE 1000 — Information Technology Services Sector

Graphic by Chris Impink

CACI's placement among Fortune's top IT companies is a result of our continuing ability to deliver innovative and effective IT solutions for our nation's highest priorities in homeland security and national defense.

Dr. J.P. (Jack) London, CACI Chairman, President, and CEO, said, "CACI's entry into the Fortune listings not only recognizes the success of our business strategies, but also confirms our employees' ability to carry on our culture of quality client service and best value.

"Our people support some of America's highest priorities in homeland security and national defense. Their ability to maintain strong client relationships both helps our country and enables our company to grow and continually compete at ever-higher levels of business."

President of U.S. Operations Paul Cofoni added, "CACI people serve their clients' vital missions with honesty and integrity, and provide unmatched expertise and technical innovation in everything they do. We thank everyone on Team CACI for bringing us to this next stage of our company's growth."

The Fortune 1000 has been described as the "short list" of the most influential companies in America, and is the most widely quoted, best-known business list in the world. Our Fortune rankings are reflective of CACI's ongoing growth: the company has nearly doubled in size in just the last few years — going from $853 million in revenue and some 6,000 employees in 2003, to more than $1.6 billion in revenue for fiscal 2005 and a current workforce of more than 10,000 people.

For more information, read the news releases on our Fortune 1000 listing and top IT ranking on CACInet or www.caci.com.
